

Job Description

Senior Composite Specialist

As part of NTG Mast Group's service division, RigPro is the only truly global rigging service provider, with an unparalleled ability to deliver engineered solutions on any type of rig and rigging.

Thanks to our global presence and rapid response, RigPro can reach our customers wherever they are, whenever they need us, and we are committed to the top standards of customer care and service.

At RigPro, yacht safety, enjoyment, and performance are our priority. We inspire people to sail, making every RigPro experience a great one by delivering exceptional products and service solutions.

Your Mission

As a Composite Specialist you will be responsible for the onsite completion and management of the RigPro Europe composite solution requirements. This involves direct management and work on composite projects at every level of complexity including leading a project team of technicians. Your work will involve meeting and liaising with clients, vendors and other employees of the NTG group.

Main Responsibilities

- To advise customers on technical matters relating to carbon fibre repair and upgrades.
- To assist Projects Managers with scope and price proposal to customers.
- To develop and manage a team of composite technicians for domestic and international projects.
- To prepare Composite Standard Operating Procedures, including multimedia content (i.e., text, videos, photos and diagrams).
- To keep up to date with all project communication with the ability to provide knowledgeable input when necessary.
- To lead domestic and international on-site projects, ensuring that equipment, repairs and services are being completed on-time, in accordance with the specification and to an acceptable standard of excellence.
- To communicate effectively with all parties involved within the project.
- To review & provide feedback on drawings and schematics when requested using AutoCAD and 3D Design packages.
- To manage project risk assessments and update the project risk matrix.

- Source composite materials more efficiently and if possible, at cheaper prices.

What we need from you

Technical skills:

- Around 3-5 years' experience in a similar role.
- Proficiency level of English.
- University Degree or related, and Spanish would be a plus.
- Driving licence.

Personal skills:

- You have good communication and interpersonal skills.
- You are a highly motivated person and ethically performance driven.
- You will show your leadership skills while managing projects.
- You will stay focused and show your organisational skills while working under pressure.
- You are a problem-solving person and will keep a can-do attitude in your daily tasks.
- You have a passion for sailing and a strong interest in sailing systems.
- Experience with carbon fibre products, mechanical works and understanding of hydraulics/electrical systems will be an advantage.

What we offer

- **For a rigging professional in the marine industry nothing beats working at RigPro – you will have the opportunity to work on the world's greatest yachts, with some of the world's greatest sailors.**
- **A number of our team regularly sail in top events like the Superyacht Cup Palma.**
- **RigPro team members are sometimes seconded to top race teams, including America's Cup teams.**
- **Being part of the group that leads the way in developing above deck systems for the world's most advanced race yachts, from the America's Cup to the world's most eminent Superyachts.**
- **You will join the world's most trusted sailing system advisors.**
- **The possibility of taking part in a variety of projects with opportunities to engage with a global team and client base daily.**
- **Long term position contract.**
- **Flexibility to match other commitments and activities... like sailing!**
